

HPV Education Webinar

CASE Approach to HPV Vaccine Hesitancy

Thursday, April 13, 2017
12:00PM to 1:00PM CST

Learning Objectives:

- Articulate a strong recommendation for the HPV vaccine
- Describe the four components to the C.A.S.E. Approach
- Demonstrate how to apply the C.A.S.E. approach in three scenarios of vaccine hesitancy

ABOUT THE PRESENTER

Robert M. Jacobson, M.D., serves as the medical director for the Population Health Science Program at Mayo Clinic's Robert D. and Patricia E. Kern Center for the Science of Health Care Delivery. He also leads Mayo's Employee and Community Health (ECH) Research Initiative. To improve patient health, the ECH initiative created a base of investigation for the study of population-based interventions. The Population Health Science Program will lead these investigations. The joint efforts will involve the direct participation of our community of patients and their families, our ECH consulting and allied health staff, and the Population Health Science Program.
